## DRUM ROLLING MIXERS

### Drum Rolling Mixer FRM 50/200

Drum Rolling Mixer

FRM 50/200

#### Range of Application

For mixing, rearrangement, burr removing, dissolving, emulsifying, grinding etc. of powders, granules, liquids and solid liquid mixtures.

#### Operation

The drum is put onto the roller track and is centred by means of the adjustable fixing device with ball rollers. As soon as the machine is switched on, the horizontal mixing movement starts. According to the EC directives, a protective device has to be provided for the area of rotation.

#### Advantages

- mixing, rearrangement, burr removing, dissolving, emulsifying, grinding etc.
- construction sizes for 50 to 200 l
- variable speed
- as an option conformity to ATEX acc. to regulation 94/9 EC
